

# Terminology challenge

Match each of the six climate change terms with their definition.

Terminology	Definition
1.Mitigation	(a) The process of removing carbon from the atmosphere and storing it in a reservoir.
2.Adaptation	(b) Any reservoir, natural or otherwise, that accumulates and stores carbon for an indefinite period.
3.Carbon sequestration	(c) Actions to reduce human emissions of greenhouse gases (GHGs) and to reduce their concentration in the atmosphere.
4.Carbon Neutral (net zero carbon)	(d) A product or service that creates no carbon emissions.
5.Carbon sink	(e) The process of adjusting to current or expected climate change and its effects.
6.Zero carbon	(f) A state in which the greenhouse gases going into the atmosphere are balanced by removal out of the atmosphere.
